## **PROHIBITION OF CHILD MARRIAGE**

Child marriage is a common practice in many countries around the world. However it is prevalent especially in India. According to UNICEF, 47% of girls are married by 18 years of age, and 18% are married by 15 years of age. Indian law has made child marriage ILLEGAL, but it is still widely practised across the nation. It affects both boys and girls.

- Girls who marry earlier in life are twice more likely to die during childbirth than girls between 20 and 24 years of age.
- Girls younger than 15 years of age are 5 times more likely to die during childbirth.
- Infants born to mothers under the age of 18 are 60% more likely to die in their first year than to mothers over the age of 19.
- If the children survive, they are more likely to suffer from low birth weight, malnutrition, and late physical and cognitive development.
- A study conducted in India by the International Centre for Research on Women showed that girls married before 18 years of age are twice as likely to be beaten, slapped, or threatened by their husbands.

**“Prohibit child marriage !  
Preserve the budding youth !”**
